● Small Business Restructures: Strategies, avoiding pitfalls and case studies

Andrew Henshaw, Director - Velocity Legal

Small Businesses are in unique position in that they typically have more tools available to reduce, eliminate or rollover the tax liabilities that would otherwise arise from a business restructure.

In addition to general CGT rollovers such as those contained in Subdivisions 122A, 122-B, 124-N, 124-M and Division 615, those options include the Small Business Restructure Rollover (Subdivision 328-G) and the Small Business CGT Concessions (Division 152).

This session will look at using the Small Business Restructure Rollover and the Small Business CGT Concessions to facilitate a business restructure and examine the pros and cons of each option, tips and traps (and how to avoid them) when restructuring small businesses, and case studies.

● Division 7A & Payments

Peter Adams, Principal - Augmentors

Division 7A has often been described as a weapon of mass destruction but the mistaken perception is that it only applies to private company loans to shareholders and associates. In fact, Division 7A can have dire consequences in the case of private company payments including the transfer of property and the use of company assets by shareholders and associates. Unpack the scope and effect of the Div 7 payment regime and viable planning strategies to avoid paying the high price of an unfranked deemed dividend arising for shareholders or associates including in instances of marriage breakdown.
